

Rethinking Digital Transformation In The Central Region – The 4*6 Approach

Our Approach

	AWARENESS	APPLICATION	INFUSION	TRANSFORMATION
Coordination & Leadership	Formulate policies and a shared vision and strategic plan understood by all stakeholders (why, how, what) Setting the structure to support implementation	Establish structures to support implementation and strengthen governance to apply EdTech purposefully to improve learning outcomes.	Encourage self-governance, empowering schools and educators to take ownership of the process with ongoing feedback loops for improvement.	Foster adaptive governance that connects local leadership with global networks to continuously innovate, share best practices, and lead at scale.
Connectivity & Infrastructure	Make context- specific, careful selections of technology and infrastructure that fit ensuring accessibility, reliability, quality, and safety.	Ensure sustainability of the infrastructure to support consistent and uninterrupted learning and teaching experiences.	Guarantee robust, universal access that supports scalable innovation and integration of advanced learning models across the entire school ecosystem.	Evolve infrastructure into a future-ready, adaptive ecosystem that enables personalized, AI-enhanced, and globally connected learning environments—accessible anytime, anywhere.
Cost & Sustainability	Identify and set up a reliable financial models that are sustainable to fund the implementation and integration process.	Develop and manage sustainable funding streams for ensuring cost-effectiveness and continuity.	Maintain dynamic and responsive financial planning models that support evolving digital needs and educational priorities.	Institutionalize future-proof, scalable investment models—including public-private partnerships, innovation funds, and outcome-based financing—to fuel long-term digital transformation and continuous innovation.
Capacity & Culture	Building stakeholdes foundational compencyenry of using the edtech solution and establish clarity around each stakeholder's role in the digital journey.	Enhance capacity through targeted professional development and training, shifting the mindset toward purposeful EdTech use.	Create a culture of innovation and continuous improvement, where technology becomes a natural part of the learning process.	Foster adaptive, lifelong learning cultures that embrace change, adapt to emerging technologies, and model digital leadership.
Content & Solution	Provide age-appropriate, relevant content aligned to the curriculum to introduce stakeholders to digital learning.	Integrate tools that support teaching and learning outcomes, while building effective pedagogical models.	Continuously curate and refine content to stay relevant and responsive, including the use of AI-powered personalized learning.	Implement advanced and innovative learning models powered by cutting-edge content that supports all universal leaning models.
Data & Evidence	Establish a baseline with Monitoring & Evaluation (M&E) frameworks to begin collecting useful data.	Use data to assess the effectiveness of interventions and guide improvements in teaching and learning.	Promote a “build—measure—learn” culture where stakeholders make informed decisions using timely and relevant data.	Leverage real-time analytics and predictive insights to refine educational policies and drive continuous innovation.
